

## Problem Set 2 Exercise #07: Multiple of 3 or 5

**Reference:** Lecture 5 notes

**Learning objective:** Repetition statements

**Estimated completion time:** 20 minutes

### Problem statement:

Write a program **multiple\_3\_5.c** that accepts a positive integer  $n$  from the user and counts how many natural numbers below  $n$  are multiples of either 3 or 5. For example, there are 4 natural numbers below 10 that are multiples of 3 or 5. They are: 3, 5, 6 and 9.

### Sample run #1:

```
Enter n: 9
3
```

### Sample run #2:

```
Enter n: 10
4
```
